Notations

- 1Timeouts can be set in 1 second increments.
- 2Saves settings and goes to 1.0
- 3Name of member with booked meeting
- 4User touches time slot to select. User can select 1 or more concurrent time slots.
- 5Start time is derived from the time slot clicked by the user.
- 6Duration is 1 hour by default. User can increase or decrease duration by 15-minute increments.
- 7Attendees is 2 by default. User can increase # to maximum capacity, which is specified by the room attributes in Bamboo).
- 8If screen times out, the app returns to 1.0. Timeout ,for each screen should be set as a variable that can be modified on a setup screen (0.0).
- 9Adjustment increments would to be :15 for time and 1 for people
